GOLF HOLIDAYS 2007-2008

CORDOVA BAY

VICTORIA, VANCOUVER ISLAND

Cordova Bay Golf Course is an 18-hole public facility, featuring stunning views of Haro Strait and Mount Baker. Named one of the "Five Great Golf Destinations" by Golf Canada Magazine, ranked in the top 100 Women Friendly Courses in North America by Golf for Women Magazine and given a 4-Star rating on Golf Digest's Places to Play list, Cordova Bay truly is a local gem. Golfers ranging from the novice level player to the touring professional consider the course a fine test of golf. Four sets of tees allow you to choose the challenge that best suits your game.

To host a Canadian Pro Tour is a great honour for any golf course. To host one just three years after opening is remarkable. Site of the 1994 Payless Open, the course was built and is maintained to exacting standards which have made it one of Canada's finest public golf courses. The course yardage is fair at 6668 yards with a par of 72 and the Slope rating is 122 from the championship tees and 119 from the blue tees. The twenty-one stall covered driving range at Cordova Bay is the nerve centre for learning and practicing the game and is complimented by a huge practice putting green and bunker for perfecting your sand shots.

One of our favourite courses on the Island, this course is without doubt the best conditioned and most efficiently run public course anywhere. The greens are always in immaculate condition and the rest of the golf course is also pristine. Every hole is challenging but very playable and rounds are almost always under four hours – a rarity these days for a public facility. Another enjoyable feature is the attention to plantings and landscaping around the course. Watch out for the Japanese garden with its waterfall and rock pool where you might well see some deer taking a drink. There are many water features throughout the course, some directly in play, some purely for natural visual enhancement. There are also some wonderful views to the East across the Georgia Strait, with glimpses of a permanently snow capped Mount Baker rising above 10,000ft.
